

Test data description

The test data is used for the data import function of the Orbit Calculation module.

Usage:

- (1) Click the import data button  to open the dialog box, as shown in Fig. 1

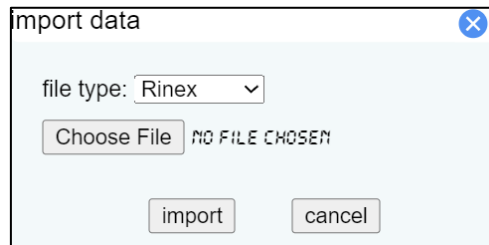

Fig. 1: The import data dialog box.

- (2) Select the file type to be imported through the drop-down box, and then click the Choose File button to select the file to be imported.

(3) In turn, import the Rinex data “hour0070.24b”, TLE data “BDSTLE2024-01-07.txt”, YUMA data “conv0070.24alc”, and SP3 data “WUM0MGXULT_20240070000_01D_05-M_ORB.SP3” in the “Test_data” folder respectively. (The import of Rinex data needs to wait for about 30 s, and the rest of the data is relatively fast)

- (3) Finally, click the “Calculate” button to get the calculation results of the imported data.
